overcome this complex and difficult situation. Other (way), we can also observe that Jane Eyre even satirizes the common opinion about young girls' behaviors, and especially Miss Scatcherd's opinion by saying: "Such is the imperfect nature of man!" (32). So we can deduce thanks to that, that Jane Eyre can question the world and type her opinion by criticizing her own society.

In conclusion, it was relevant to bring these three documents closer together to see how ~~do~~ these were documents are representative of a coming-of-age story or situation and more precisely why ~~do~~ main characters go through difficult events and how ~~do~~ they struggle to overcome them and feel more free. Thanks to these documents, we have seen that characters usually face issues when they are young and then, by experiencing conflicts and clashes with ~~the~~ society or their family, come to assert themselves, own their destiny and make mature and independent responses and decisions. Nevertheless the analysis of these document doesn't allow an exhaustive study of the subject, which is the emancipation of a character who tries to establish his own rules, because none of them really deals with the sudden realization of the protagonist that adulthood is very complex.
